# Energy Efficient Glass

## The best performing windows

A staggering 26% of all domestic heat loss escapes through the windows. By utilising the very latest in glass technology you could save on your heating bills each and every year!

The new range is three times more efficient than single glazed units and at least 25% more efficient than most currently installed double glazing!

## Glass Range

Our advanced coating technology reflects radiated heat back into the room, rather than allowing it to escape through the windows. At the same time it allows free heat and light from the sun to pass through the glass. The result? Lighter, brighter, warmer and more energy efficient homes thanks to the advanced thermal insulation.
